

RotaCol® - Silverline

ANALOG CONTACTLESS ROTARY POSITION SENSOR

SERVO MOUNT - 2 PRECISION BALL BEARINGS

Series 36A MSL RCS
Series 36A ZSL RCS

Metalcase - Hall effect magnetic
Output : 0 - 5V, 0 - 10V, 4 - 20 mA, 0 - 20 mA
36 mm Ø metal aluminium housing with 2 precision ball bearings
Servo mount / Screw fitting
Shock & vibration proof, Measurement range 0° - 360°

1-Supply (red); 2-Output (brown); 3-Ground (black) : For **OCG, OCR**
 1-Supply (red); 2-Output (yellow); 3-Ground (black) : For **OCF**
 1- Supply ; 2-Output ; 3-Ground : For **OCM, OCTA , OCTR**

For full range of Rotary Sensor refer -
www.rotacol.info/rotamec.pdf

FUNCTION PRINCIPLE

The determination of angular position and signal generation is realised by an intelligent CMOS Hall sensor. A diametrical polarised magnet induces its magnetic field into the sensor. It rotates and provides a conditioned signal to the integrated electronic.

ELECTRICAL CHARACTERISTICS

Electrical angle	0 - 360°, any angle from 0 - 20..0 - 360 programmable in steps of 1°	
Electrical speed (max.)	160 rpm (default) / 800 rpm (optional)	
Resolution	4096 step (12 bit)	
Signal type	Supply voltage	Output signal
0505	5V ± 10%	0 - 5V (ratiometric)
DC05	9 - 30V	0 - 5V
2410	15 - 30V	0 - 10V
2442	15 - 30V	4 - 20 mA
2420	15 - 30V	0 - 20 mA
Supply current	< 16 mA	
Independent linearity tolerance	± 0.5%	
Update rate	1 ms	

ANALOG INTERFACE

MECHANICAL CHARACTERISTICS

Mechanical angle	360° (continuous)	
Shaft diameter and length (FMS)	Metric	6 mm Ø X 22 mm (MSL)
	Inch	1/4" Ø X 22 mm (ZSL)
Operating torque (approx.)	0.05 Ncm	
Protection	IP 40	
Operating temperature	- 40 to +85° C	
Operating life (approx.)	35 million rotations	
Mechanical speed (max.)	8000 rpm	
Weight	60 gm	
Interconnection	3 pins (default)	

At the output of the sensor a variable voltage or variable current is provided proportional to the position of the shaft / axis over a complete angle range of 360° or a subrange. The contactless sensor electronic guarantees a steady signal level and a very low linearity error of 0.5%. With supply voltages of 5VDC ± 10% ; 9 - 30VDC ; 15 - 30V (24VDC) output signals of 0 - 5VDC ; 0 - 10VDC ; 0 - 20mA ; 4 - 20mA at the sensor output are provided. Besides this a large variety of electrical options such as Zero point programming, Centre point programming, Multipoint programming, two channel redundant outputs are provided. Other options on request.

MATERIAL

Housing	anodized aluminium
Shaft	stainless steel
Bearings	2 precision ball bearings

Default Version :

360° CW Electrical & Mechanical angle, electrical speed 160 rpm, 3 pins

ORDERING INFORMATION

Refer to electrical and mechanical options on page 2

Housing diameter	Analogue output	Series	Mounting	Bearings	Signal	Electrical angle	Direction of Rotation	Programming options for non-effective electrical angle (only if elec. angle is < 360°)	Programming options	Special shaft length (Default 22mm FMS)	Special cable length - only for OCR, OCG (default 1 mtr long)	Output connections
36	A	MSL ZSL	RC	S	S0505 SDC05 S2410 S2442 S2420	xxx any angle from 0-20 to 0-360 programmable in steps of 1° (default 360°)	CW CCW	PEX PE1 PE2 PE3 PE4	POX POZ POC POM	AXX	CVXX	OCXX OCF OCR OCM OCG OCTA OCTR
36	A	xSL	RC	S	Sxxxx	xxx	CW / CCW	PEX	POX	Axx	CVxx	OCxx

Example with description - **36A MSL RCS S2442 180CW PE1 POZ OCM** - 36mm diameter, analog output, Metric Silverline (Shaft 6 mm Ø), RotaCol, Servo mount with 2 ball bearings, Signal - 4-20 mA, 180 angle and clockwise, Delta 1/2, Zero point, Miniature connector

Please note: The specification and information in this datasheet cannot consider all special demands that are caused by the application. Because of this, they are no general description of the properties of the product. Megacraft does not assume any responsibility for damages due to improper application of our products. The user has to ensure on his own, that the products used are suitable for his application. Megacraft does not warrant the reproducibility of published information. The specifications can be changed any time without notice.

ELECTRICAL OPTIONS FOR ANALOG VERSION 36A MSL/ZSL RCS

Non-effective Electrical Angle (PE1) - Delta 1/2

If the electrical effective angle is programmed smaller than 360°, the remaining electrical non-effective angle is divided in two equal parts : high level & low level (Delta 1/2)

Low level (PE2)

If the electrical effective angle is programmed smaller than 360°, after reaching the maximum, the signal level falls to low level.

High level (PE3)

If the electrical angle is programmed smaller than 360°, the signal level remains high after reaching the full level.

Variable level (PE4)

If the electrical angle is programmed smaller than 360°, remaining electrical non effective angle can be divided into high and low level in any ratio according to customer request.

Direction of Rotation (CW/CCW)

By default the direction of rotation is clockwise (CW). With this option it is also possible to change the direction from clockwise(CW) to counterclockwise (CCW).

Zero point Programming (POZ)

Mechanical zero point is aligned with marking on the sensor housing. Electrical zero point can be aligned to mechanical zero point. Zero point can be programmed at any offset.

Center Point Programming (POC)

Effective electrical angle is aligned with the mechanical zero point in such a way that equal effective angles in both rotating directions are achieved. Center point can be programmed at any offset.

Multi Point Programming (POM)

Output characteristics : 3 to 6 rising or falling linear segments. Min and max signal level can be defined within the total electrical angle. First and last linear segment (min/max) is always horizontal. 1 to 3 settable calibration points.

2 Channel Redundant Output (2C)

This is realized by a Hall sensor chip consisting of 2 galvanically separated sensing elements. One magnet provides a magnetic field simultaneously for both elements. Both elements can be programmed identically, or channel 2 can also be programmed independently from channel 1. (Valid only for 0505, DC05, and 2410 outputs).

MECHANICAL OPTIONS FOR ANALOG VERSION 36A MSL/ZSL RCS

Type / Series	Standard mechanical options	Customized mechanical options
36A MSL/ZSL RCS	Cable gland (OCG), round cable(OCR), miniature connector (OCM), terminal block (OCTA / R)	Special shaft length; special cable length

INTERCONNECTIONS

Standard Interconnections - 3 pins

Other Interconnection options

Cable gland (OCG)

3 core round cable 1 m long

Miniature connector (OCM)

3 pin in integrated socket with plug

Terminal block - Axial (OCTA) Wires leaving axial to shaft axis

3 sockets

Terminal block - Radial (OCTR) Wires leaving radial to shaft axis

3 sockets
